

Crusher Bolts

At Brooks Forgings Ltd we produce a wide range of hot forged bolts in high tensile steels for the machinery, crushing and screening industries.

Sizes range from M16 up to M64 with varying head shapes, up to 1.5m in length.

For large volume orders we're prepared to negotiate a 12 month usage and deliver against your call-off requirements.

This would enable you to take advantage of a fixed price established at the start of a contract and so avoid paying increases as a result of continuing raw material upward movements.

Our full range of bolts includes:

- Anchor Bolts
- Blade Bolts
- Bucket Tooth Bolts
- Carriage Bolts
- Crusher Bolts & Studs
- Elevator Bolts
- Eye Bolts
- Hex Cap Screws
- Lag Bolts
- Lift Eye Bolts
- Machine Bolts
- Plow Bolts
- Step Bolts
- Structural Bolts
- Stud Bolts
- Threaded Rod Bolts
- U Bolts
